BODY · RESHAPING · HI-EMT TECHNOLOGY

Hermes Slim

It makes the muscle work in depth. No electrodes, no electrical contact.

Hermes Slim uses a focused electromagnetic field (HI-EMT, also called HIFEM) that reaches muscles up to 8 cm deep and makes them contract beyond what normal physical activity achieves. It isn't electrostimulation. The standard session lasts 30 minutes.

HI-EMT | Up to 8 cm | 30-minute session | One or two handpieces | CE certified

We don't sell devices.
We build working systems.

HOW IT WORKS

It isn't electrostimulation.

The focused electromagnetic field passes through the skin and fatty tissue and directly stimulates the deep motor neurons: the muscle contracts supramaximally, at a rate normal exercise cannot reach. The device is non-ionising, athermal and acts only on motor neurons, not on sensory ones.

	EMS with electrodes	HI-EMT · Hermes Slim
How the energy arrives	Current through electrodes on the skin	Focused electromagnetic field: **no electrodes**
Sensation	May cause tingling or burning	**No tingling or burning**
Depth	Superficial layers	**Deep, up to 8 cm**
Muscle fibres activated	Fewer fibres	**Many more fibres**
Contraction	Conventional	**Supramaximal**
Intensity is limited by	Skin tolerance	Muscle tolerance

THE AREAS

Where it works.

Main areas

Abdomen · Glutes · Thighs · Inner thigh · Back

Treatable with a higher number of sessions

Arms · Shoulders · Calves

DUAL ACTION

Muscle and fatty tissue.

The manufacturer describes Hermes Slim as a technology that works on muscle strengthening and localised fat in the same session. For each treatment, parameters and number of sessions are decided in the treatment room, after assessing the client.

TECHNICAL SHEET

The data from the user manual.

Feature	Hermes Slim
Technology	HI-EMT (HIFEM), non-invasive
Depth	Up to 8 cm, with two large plates
Handpieces	Version with one or two handpieces
Interface	LCD touch screen · Auto and Manual modes
Pulse	4 levels: continuous, pulse 1, pulse 2, automatic
Frequencies	F1 · F2 · F3 from 1 to 150 Hz in the manual protocol
Cooling	Continuous TEC (–10 °C ~ 40 °C)
Maximum consumption	900 W
Power supply	AC 220 V / 50 Hz or 110 V / 60 Hz
Nature	Device for aesthetic use, CE certified. Not a medical device

THE SESSIONS

How long, how often.

30 · 45 · 60 minutes

Standard, intensive, maximal session. At most two treatments a day: upper and lower body.

2 a week, for a month

This is the optimal protocol given in the manual. Then one maintenance session a month.

5 modes per area

HIIT, strength, muscle development, body shaping, fat burning: power and frequencies already set for arms, calves, thighs, glutes and abdomen.

WHEN NOT TO USE IT

Absolute contraindications.

Pacemaker, defibrillator and other active electronic implants, neurostimulators and cochlear implant · pregnancy · active cancer · epilepsy · active infections and high fever · deep vein thrombosis · active bleeding · serious heart disease · recent stroke or heart attack. Other conditions need a case-by-case assessment: the full list is in the user manual, which we deliver with the device.

THE NIPEC METHOD

A process that doesn't stop at delivery.

The device is just the beginning. What keeps a centre working is what comes after: the protocols, a trained operator, someone who picks up the phone. That's why we work in four stages.

01

Analysis

Before talking about devices, we look at your centre: who your clients are, how many treatment rooms you have, what an hour of work costs, what you already sell.

- Questionnaire and visit (or video call)
- Review of your price list and diary
- Where the margin you lose today sits

02

Design

Together we choose the right technology and build the treatment around it: prices, packages, session length, purchase formula.

- Device and configuration
- Treatment price list and packages
- Purchase or rental, with the numbers on the table

03

Training

Hands-on delivery in the treatment room and a staged path that ends with an exam. The operator leaves with a certificate valid for 12 months.

- Day 0 in the room, +7 follow-up, +21 online
- Exam at +45 days
- Protocols and rule cards, in Italian and Albanian

04

Ongoing support

After delivery we stay. A single contact for your centre, direct assistance and a monthly check to prevent device downtime.

- 10-minute monthly video call
- Parts replacement and logistics
- Launch marketing campaign

THE CERTIFICATION PATH

Day 0
Hands-on delivery

In the treatment room, on the centre's own device, with real clients.

+7
Follow-up

We correct the bad habits of the first week.

+21
Online

Advanced protocols and real cases brought by the operators.

+45
Exam

Practical test and a 20-question written test.

12 months
Certificate

Personal certificate to display in the centre. Renewed every year.

Want to bring Hermes to your centre?

Purchase or rental. We start from an analysis of your centre and show you the numbers before you sign.
